Terminal Disclaimer

1. The terminal disclaimer filed on 11/01/04 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patent Nos. 6,718,858 and 6,508,154 has been reviewed and is NOT accepted.

An attorney or agent, not of record, is not authorized to sign a terminal disclaimer in the capacity as an attorney or agent acting in a representative capacity as provided by 37 CFR 1.34 (a). See 37 CFR 1.321(b) and/or (c).

It would be acceptable for a person, other than a recognized officer, to sign a terminal disclaimer, provided the record for the application includes a statement that the person is empowered to sign terminal disclaimers and/or act on behalf of the organization.

Accordingly, a new terminal disclaimer which includes the above empowerment statement will be considered to be signed by an appropriate official of the assignee. A separately filed paper referencing the previously filed terminal disclaimer and containing a proper empowerment statement would also be acceptable.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969). A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b). Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully

comply with 37 CFR 3.73(b).

3. Claims 3-6 and 9-12 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 14, 15, 17, and 25 of U.S. Patent No. 6,718,858. Although the conflicting claims are not identical, they are not patentably distinct from the patent claims because all of the limitations in claims 3-6 and 9-12 can be found in claims 14, 15, and 17 of the patent.

4. Claims 3-6 and 9-12 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 2, 5, and 10 of U.S. Patent No. 6,508,154. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 3-6 and 9-12 contain all the limitations of the claims 5, 6, and 12 of the patent.

Allowable Subject Matter

5. Claims 3-6 and 9-12 are allowed. The following is a statement of reasons for the indication of allowable subject matter: the prior art teaches an integrated package separator including a base and a support over the base and first and second lift members configured to vertically displaced the support and lift the support off the base by contacting the support. The prior art also teaches that the lifting member are connected to a pair of pneumatic actuators including release valves configured to equilibrate a back-pressure of each of the pneumatic actuators to ambient during lifting of the support. The prior art also teaches a cutting mechanism configured to cut the board while the board is over the upper surface of the support to separate the integrated circuit package from one another. However the prior fails to teach that the support includes an upper surface and a plurality of holes extending

therethrough and the plurality of pins being configured to extend through ones of the plurality of holes as set forth in claims 3 and 9. The prior art also fails to teach that the planar surface of the first and second lift members being substantially flush with the planar surface of the base as set forth in claims 6 and 12.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
